Transforming **large scale** Software portfolio with
Containers and Microservices at the speed of DevOps

Our solution

What is a container?

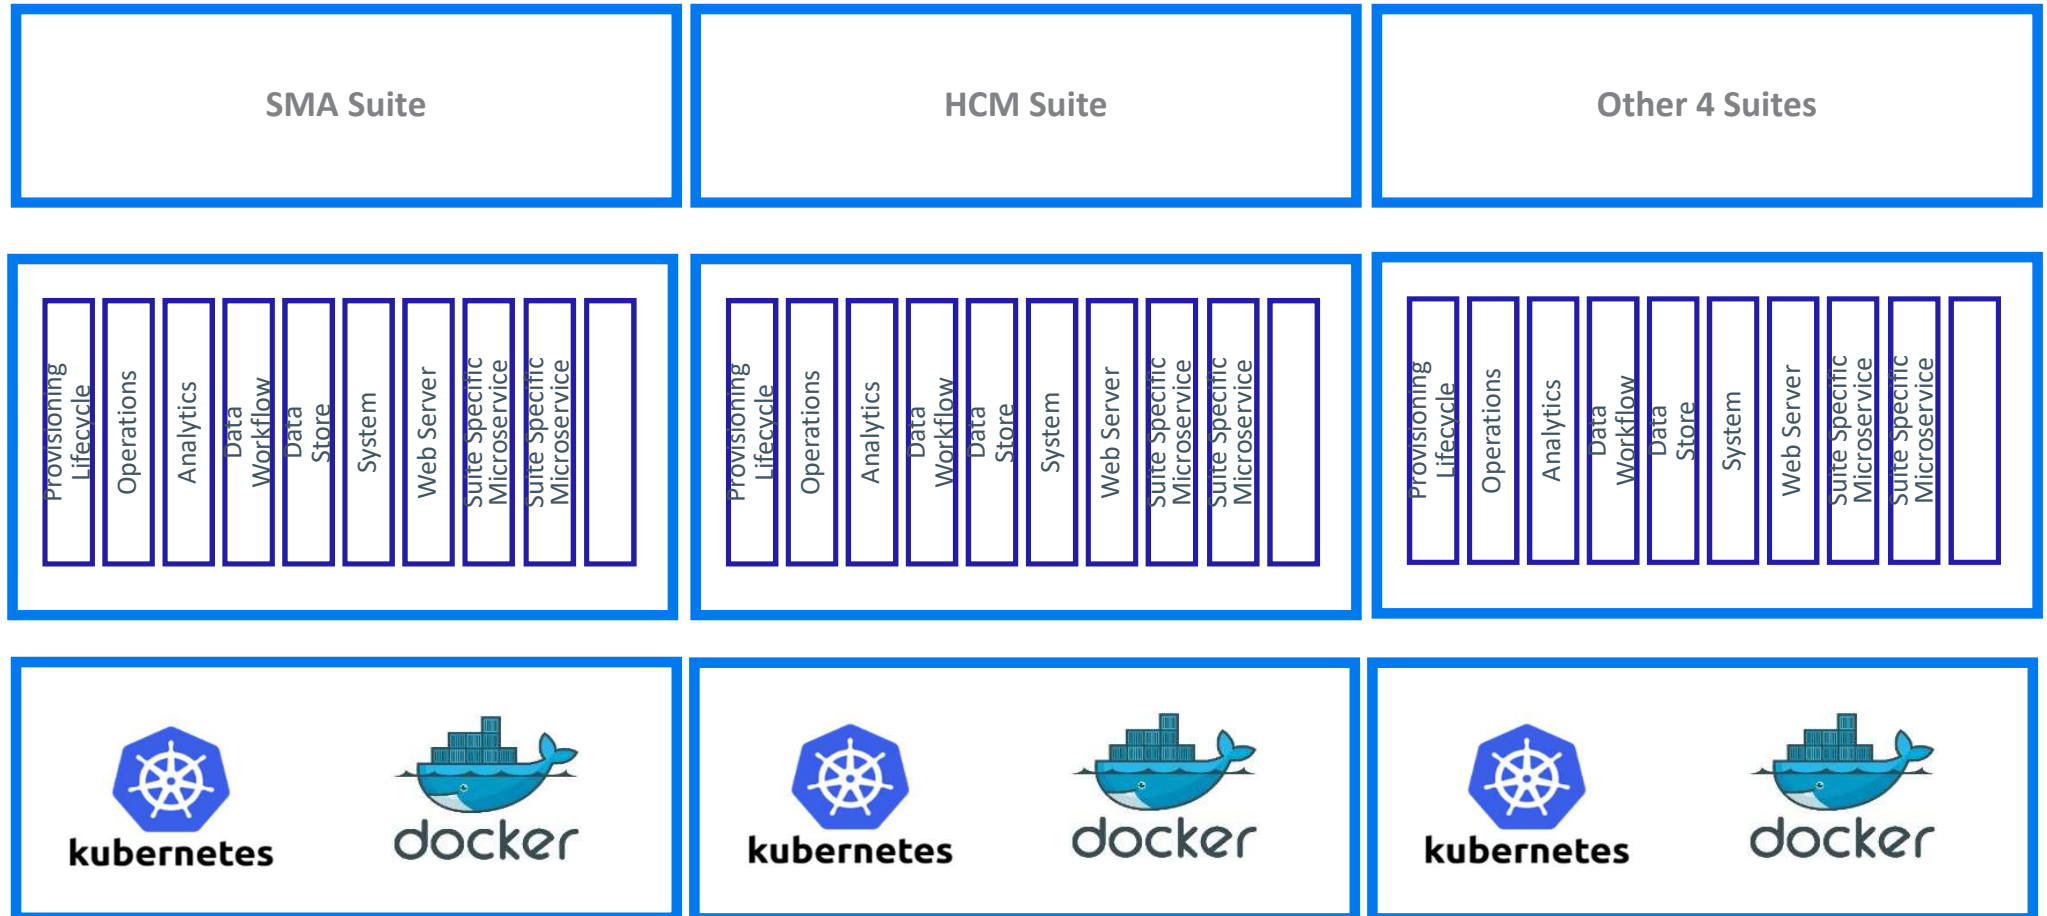

- Standardized, portable anywhere
- Lightweight, share the same OS kernel
- Secure, isolate apps from each other

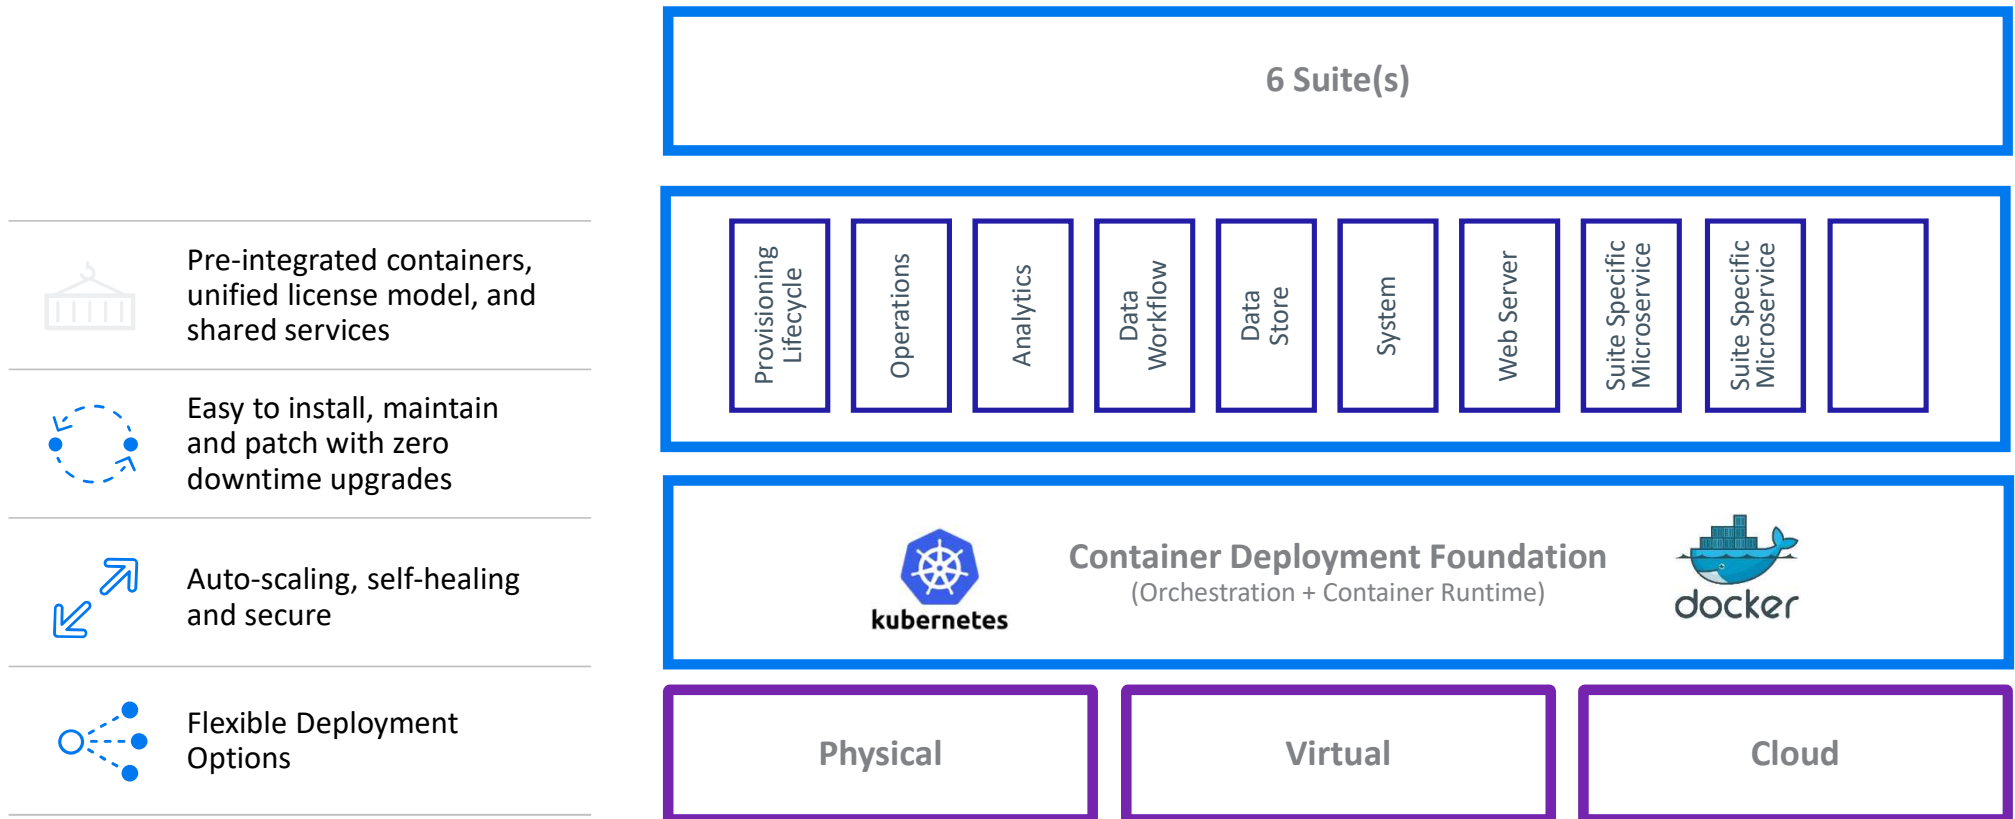

Our IT Operation Management portfolio in 2017

Service Manager	OMU	NNMi	SiteScope
Asset Manager	OpsA	Service Automation	Service Anywhere
CMS	OBR	Operations Orchestration	Database and Middleware Automation
OMi	Cloud Service Automation	Release Control	Other 32 products ...

From 40+ products to 6 suites

Build Container Deployment Foundation

Result by number

Efficiency improvements	Traditional	Container
Buy/Sell	 47 products	 6 suites
Time to install	 6 months	 3 months
Time to release	 2-15 days	 8 hours
High Availability	 Per Product	 Built-in
Time to integrate	 2-3 weeks	 Pre-Built

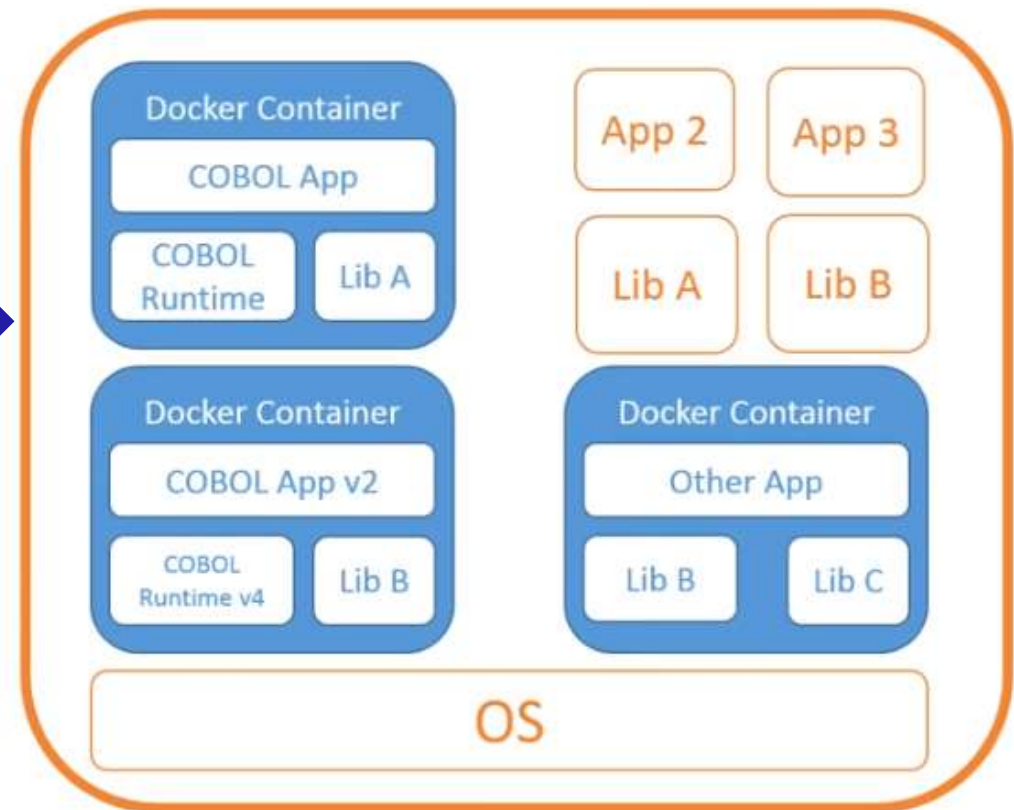

High-degree of automation delivered by the underlying platform

A side story about Cobol

Mainframe

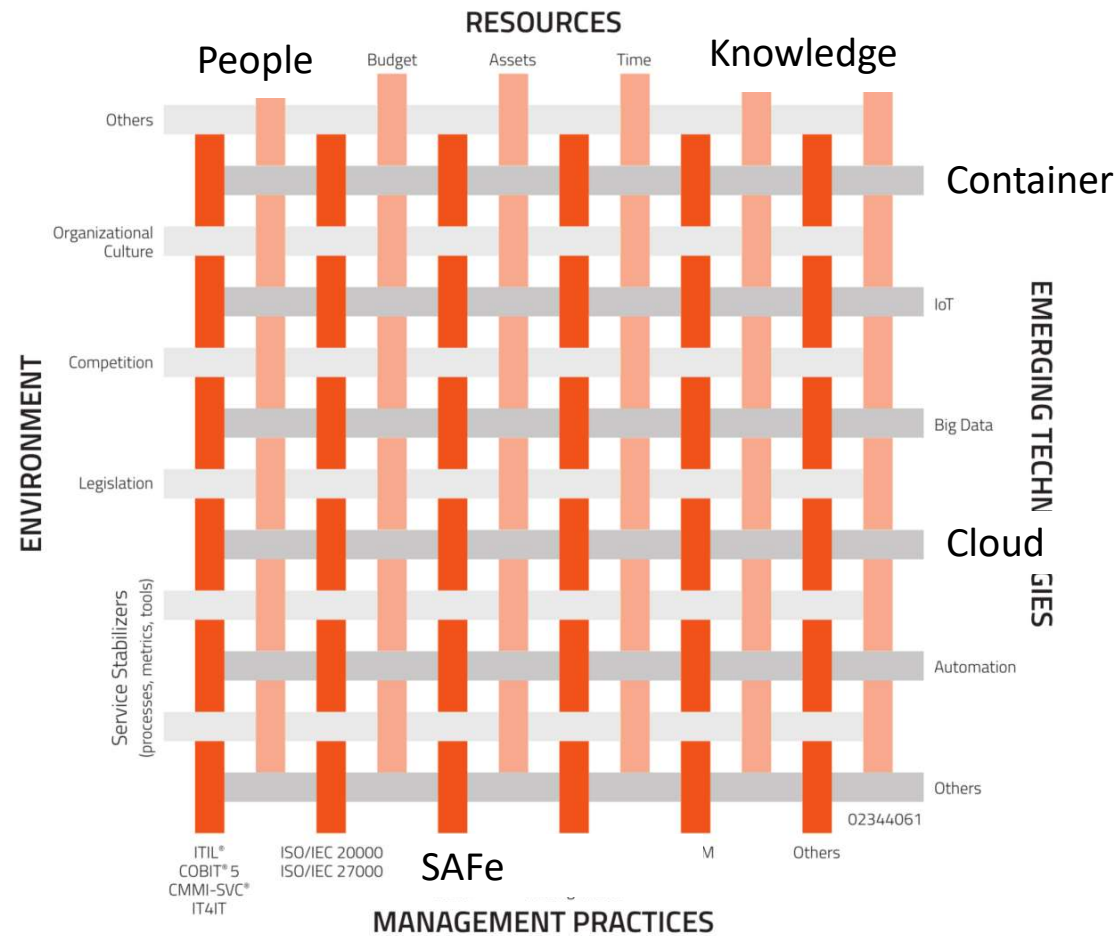

Linux, Unix, Windows, Cloud...
